

Peanut Butter for Life

Forever Nuts Program

Thank you for your interest in Vermont Peanut Butter and the Forever Nuts Program! We are excited to partner with you and provide you and your family the best peanut butter on the market. Please read the following guidelines and process for this program. We take our products seriously, putting attention on quality, nutrition and taste. Our Team appreciates your support, and are extremely confident that you will enjoy every jar you receive.

Procedure:

You will be assigned your **Peanut Butter for Life** Official Number upon your first order. You may refill one jar per week by bringing in any 16oz. jar of your own to our facility located at 125 Munson Ave, Morrisville VT 05661. You may have your jar filled up upon your first visit, should you like the product we are currently producing. After your first order, you may call in ahead of time to find out our production schedule, to have us fill your jar with your favorite product. You may bring in more than one jar at once and have us fill several weeks' worth if you like. If you are not local, and cannot get to us in person, we can receive your jars and quickly ship them back to you at your expense.

Shipping:

If you are shipping your jars to us, we will get your jars filled and shipped back to you within 5-7 days upon receipt. (Depending on the product you are ordering, and our manufacturing schedule). We can use your shipping number if you have one for Fed Ex or UPS. We require you to provide us that number along with any shipping details in writing. Our preferred shipping provider with Vermont Peanut Butter is UPS.

Jars:

Your jars must be given to us completely cleaned, sanitized and ready to fill. We are not responsible for dirty jars that are given to us, and we will not fill any jars we feel unsanitary to fill. You may buy a jar and lid from us for \$.50 if necessary.

Shelf Life:

Our product is made fresh and is meant to be consumed in a fairly short amount of time. Our sealed commercially sold product shelf life ranges from 1 year to 5 months depending on the item. We assume you will be consuming our products much faster than this. It is always best to store nut butters in a cool temperature for the preservation of flavor and to prevent oil separation.

By signing this page, you are acknowledging that you have read, and fully understand all of the aforementioned rules and procedures, and additionally understand without reservations, that Peanut Butter for Life, and the Forever Nuts Program is a voluntary program, and is by no matter an actual investment for ownership of Vermont Peanut Butter Company, Inc in any way.
